It is this surgery's policy to not email medical information due to the changes in the Privacy Laws February 2018.

It is important to know that the content of emails is and remains the property of the ISP (Internet Service Provider). For this and other reasons, we unfortunately can not guarantee that information shared digitally will remain private.

If you understand this and accept the inherent risks involved, the surgery is prepared to email medical information to you. Password protection to access the email will be provided to you either via SMS or over the phone.

Finally, our email address is not designed to be a means of back and forth communication and it is not checked every day. It will simply be used to send you the information that you have requested. All questions should be directed to the front desk on 9819 4044.

I have read and understand the above, and I accept fully the inherent risks of sharing information digitally. Furthermore, I accept full responsibility for any data breaches that may occur as a result of sharing information digitally, however they may come about.
